**AMENDMENTS**

The following listing of Claims will replace all prior versions and listing of claims in the application.

1. (original) A computer program product for managing print requests for a plurality of electronic documents, the product comprising a computer useable medium having computer readable instructions thereon for:

associating the print requests with a job set; and  
providing user accessible controls for managing the job set.

2. (original) The product of Claim 1, wherein the instructions for associating comprise instructions for generating an interface screen with controls allowing the user to associate the print requests with a new or existing job set.

3. (original) The product of Claim 1, further comprising instructions for monitoring the job set.

4. (original) The product of Claim 3, wherein the instructions for monitoring comprise instructions for generating an interface screen displaying the status of each print request associated with the job set.

5. (currently amended) ~~The product of Claim 1,~~ A computer program product for managing print requests for a plurality of electronic documents, the product comprising a computer useable medium having computer readable instructions thereon for:

associating the print requests with a job set; and  
providing user accessible controls for managing the job set, wherein the instructions for providing user accessible controls comprise instructions for generating an interface screen allowing simultaneous management of each print

request in the job set, the user interface screen including a control for allowing the user to simultaneously start or pause each print request in the job set.

6. (cancelled)

7. (original) The product of Claim 5, wherein the interface screen includes a control for allowing the user to simultaneously delete each print request in the job set.

8. (original) The product of Claim 5, wherein the interface screen includes a control for allowing the user to simultaneously change the priority of each print request in the job set in relation to the other print requests.

9. (original) The product of Claim 8, wherein the interface screen includes a control for allowing the user to simultaneously redirect each print request in the job set.

10. (currently amended) ~~The product of Claim 5,~~ A computer program product for managing print requests for a plurality of electronic documents, the product comprising a computer useable medium having computer readable instructions thereon for:

associating the print requests with a job set; and

providing user accessible controls for managing the job set, wherein the instructions for providing user accessible controls comprise further instructions for generating an interface screen allowing individual management of each print request in the job set, the user interface screen including a control for allowing the user to individually start or pause one or more selected print requests within the job set.

11. (cancelled)

12. (original) The product of Claim 10, wherein the interface screen includes a control for allowing the user to individually delete one or more selected print requests within the job set.

13. (original) The product of Claim 10, wherein the interface screen includes a control for allowing the user to individually redirect one or more selected print requests within the job set.

14. (currently amended) ~~In a computer system, a~~ A method for managing print requests for a plurality of electronic documents, comprising:  
associating the documents with a job set; and  
providing user accessible controls for managing the job set.

15. (original) The method of Claim 14, wherein the act of associating comprises generating an interface screen with controls allowing the user to associate the print requests with a new or existing job set.

16. (original) The method of Claim 14, further comprising generating an interface screen displaying the status of each print request associated with the job set.

17. (original) The method of Claim 14, wherein the act of providing user accessible controls comprises generating an interface screen allowing simultaneous management of each print request in the job set.

18. (original) The method of Claim 17, wherein the act of providing user accessible controls further comprises generating an interface screen allowing individual management of each print request in the job set.

19. (currently amended) A system for managing a plurality of print requests associated with a job set, comprising:

one or more client computers operative to issue print requests;  
one or more image forming devices operative to print the print requests;  
a queue operative to electronically hold the print requests;  
a queue manager operative to administer the print requests within the queue; and

user accessible controls for directing the queue manager to simultaneously administer each print request in a selected job set, wherein at least one user accessible control is either a control for allowing a user to individually start or pause one or more selected print requests within the job set or a control for allowing the user to simultaneously start or pause each print request in the job set.

20. (currently amended) The system of Claim ~~19~~ 20, further comprising a user interface generator operative to generate the user accessible controls on a user interface.

21. (new) A method for managing print requests for a plurality of electronic documents, comprising:

associating the documents with a job set; and  
providing user accessible controls for managing the job set, wherein at least one user accessible control is either a control for allowing a user to individually start or pause one or more selected print requests within the job set or a control for allowing the user to simultaneously start or pause each print request in the job set.

22. (new) The method of Claim 21, wherein the act of associating comprises generating an interface screen with controls allowing the user to associate the print requests with a new or existing job set.

23. (new) The method of Claim 21, further comprising generating an interface screen displaying the status of each print request associated with the job set.

24. (new) The method of Claim 21, wherein the act of providing user accessible controls comprises generating an interface screen allowing simultaneous management of each print request in the job set.

25. (new) The method of Claim 24, wherein the act of providing user accessible controls further comprises generating an interface screen allowing individual management of each print request in the job set.
